PRE-SALE WHITE PAPER

UPSTART

UPSTARTITATIVE CORPORATION

USC TOKEN

Upstart Corporation presents its USC Token Pre-Sale White Paper, outlining the integration of Upstart finance and blockchain technology to build a transparent and decentralized financial ecosystem. This comprehensive document details the token overview, project introduction, economic models, and technical framework of the Quantvine platform, aiming to revolutionize wealth management through technological innovation and data-driven approaches.

Token Overview and Pre-Sale Details

Token Specifications

USC tokens, based on Ethereum and Binance chains, support mainstream blockchain wallets. They are used for transaction fees, user motivation, and ecosystem services within the platform. A total of 5 billion tokens will be issued, with 1.5 billion pre-sold and the remaining 3.5 billion issued in three installments.

Pre-Sale Stages

The pre-sale occurs in three stages: January 14-28, February 14-28, and March 14-28. Each stage offers 500 million tokens with varying lock-up periods of 125, 100, and 75 days respectively. Purchases are limited to the Upstart platform, with individual account limits to ensure fairness.

Project Introduction

Upstart's mission is to bring secure, transparent and decentralized financial services to users through technological innovation and data-driven for more efficient wealth management.

1 Secure Financial Services

Upstart aims to provide secure, transparent, and decentralized financial services through technological innovation and data-driven approaches.

2 Intelligent Investment Solutions

By combining blockchain and smart contract technology, Upstart offers users intelligent investment portfolios and optimization tools.

3 Efficient Wealth Management

The platform is dedicated to innovative Upstart financial services, focusing on more efficient wealth management for its users.

Economic Models

Token Distribution

Allocated to early investors, community teams, users, incentives, eco-funds, and liquidity reserves.

Platform Innovation

Funds used for innovation and expansion of ecological functions.

Long-term Motivation

Ensures ongoing project development and marketing efforts.

User Participation

Motivates platform engagement and enhances community activity.

Incentives

Earn USC tokens for your active involvement on the platform - from holding tokens to participating in governance and providing liquidity. Our buyback mechanism further rewards users, fostering community engagement and enhancing token liquidity to drive long-term value.

Value support

Unlock a suite of benefits as a USC token holder. Gain exclusive access to data services, governance voting rights, and exclusive platform perks.

Technical Framework of the Project

Upstart Analysis Model

Utilizes data encryption and smart contracts to achieve data privacy protection and efficient transactions.

Distributed Storage

Employs encryption technology to protect user data and transaction security.

Smart Contract Audit

USC Token's smart contract will undergo independent third-party audits to ensure code security and compliance.

Decentralized Architecture

Blockchain-based structure enhances transparency and censorship resistance.

Road Map and Development Plan

- 1 — Get ready for the USC token journey. We're starting the first pre-sale round, community promotions, platform foundation construction, and USC token application launch.
- 2 — Join us for the upcoming USC token pre-sale round. Experience improved quantification, mobile app launches, and expansion into global markets with regional appreciation programs.
- 3 — Participate in the third USC token pre-sale round to bolster platform user support. Establishing robust locking and unlocking procedures post-token issuance, guaranteeing information transparency and accountability.
- 4 — Foster an engaged community network via social media, forums, and crypto platforms to amplify project awareness through targeted press events, strategic partnerships, and media outreach.
- 5 — Commencing the first token issuance round, collaborating with various exchanges to ensure robust security measures and technical assistance throughout the issuance process.
- 6 — Engage the community with timely release announcements, conduct listing events, and implement feedback systems for active participation.
- 7 — Aligning pricing for the upcoming token offering round with market conditions, teaming up with various prominent blockchain tech companies, financial institutions, and research bodies to amplify technical and market backing for the ecosystem.
- 8 — Partnering for the integration of Starlink systems to advance related industries.
- 9 — Aligning the third token issuance round pricing with market conditions, continuously innovating and expanding token application possibilities.
- 10 — Engage the community through a reward system, enhance product features and user experience based on community feedback, and advance project development.

Execute presale token offerings, audit smart contracts, extensively test token contracts, establish eco-partnerships, and collaborate with exchanges for token listing.

Drive token listing and trading, launch quantitative strategy modules, boost community engagement through press conferences, media coverage, and other activities to increase project visibility.

Drive ongoing enhancement and maintenance of token contracts and related products in alignment with market needs and technological advancements, diversify the platform's financial product range, achieve decentralized governance, and expand into the global market.

Risk Analysis and Compliance

Market Volatility

The company implements risk control measures to address cryptocurrency market fluctuations.

Regulatory Compliance

Strict adherence to local regulations, with users required to pass KYC/AML verification to ensure compliance and protect investor rights.

Platform Security

Security audits and real-time monitoring through smart contracts ensure the stability and security of the platform.

Team Introduction

Expert Team

Upstart brings together experts in fintech, Upstart trading, and blockchain, with extensive financial and technical experience.

Specialized Knowledge

The team includes specialists in Upstart finance, blockchain development, and risk management, ensuring technological innovation and business compliance.

Community Development and Partnerships

Governance Participation

USC token holders are encouraged to participate in platform governance, helping to build an active decentralized community.

Regular Events

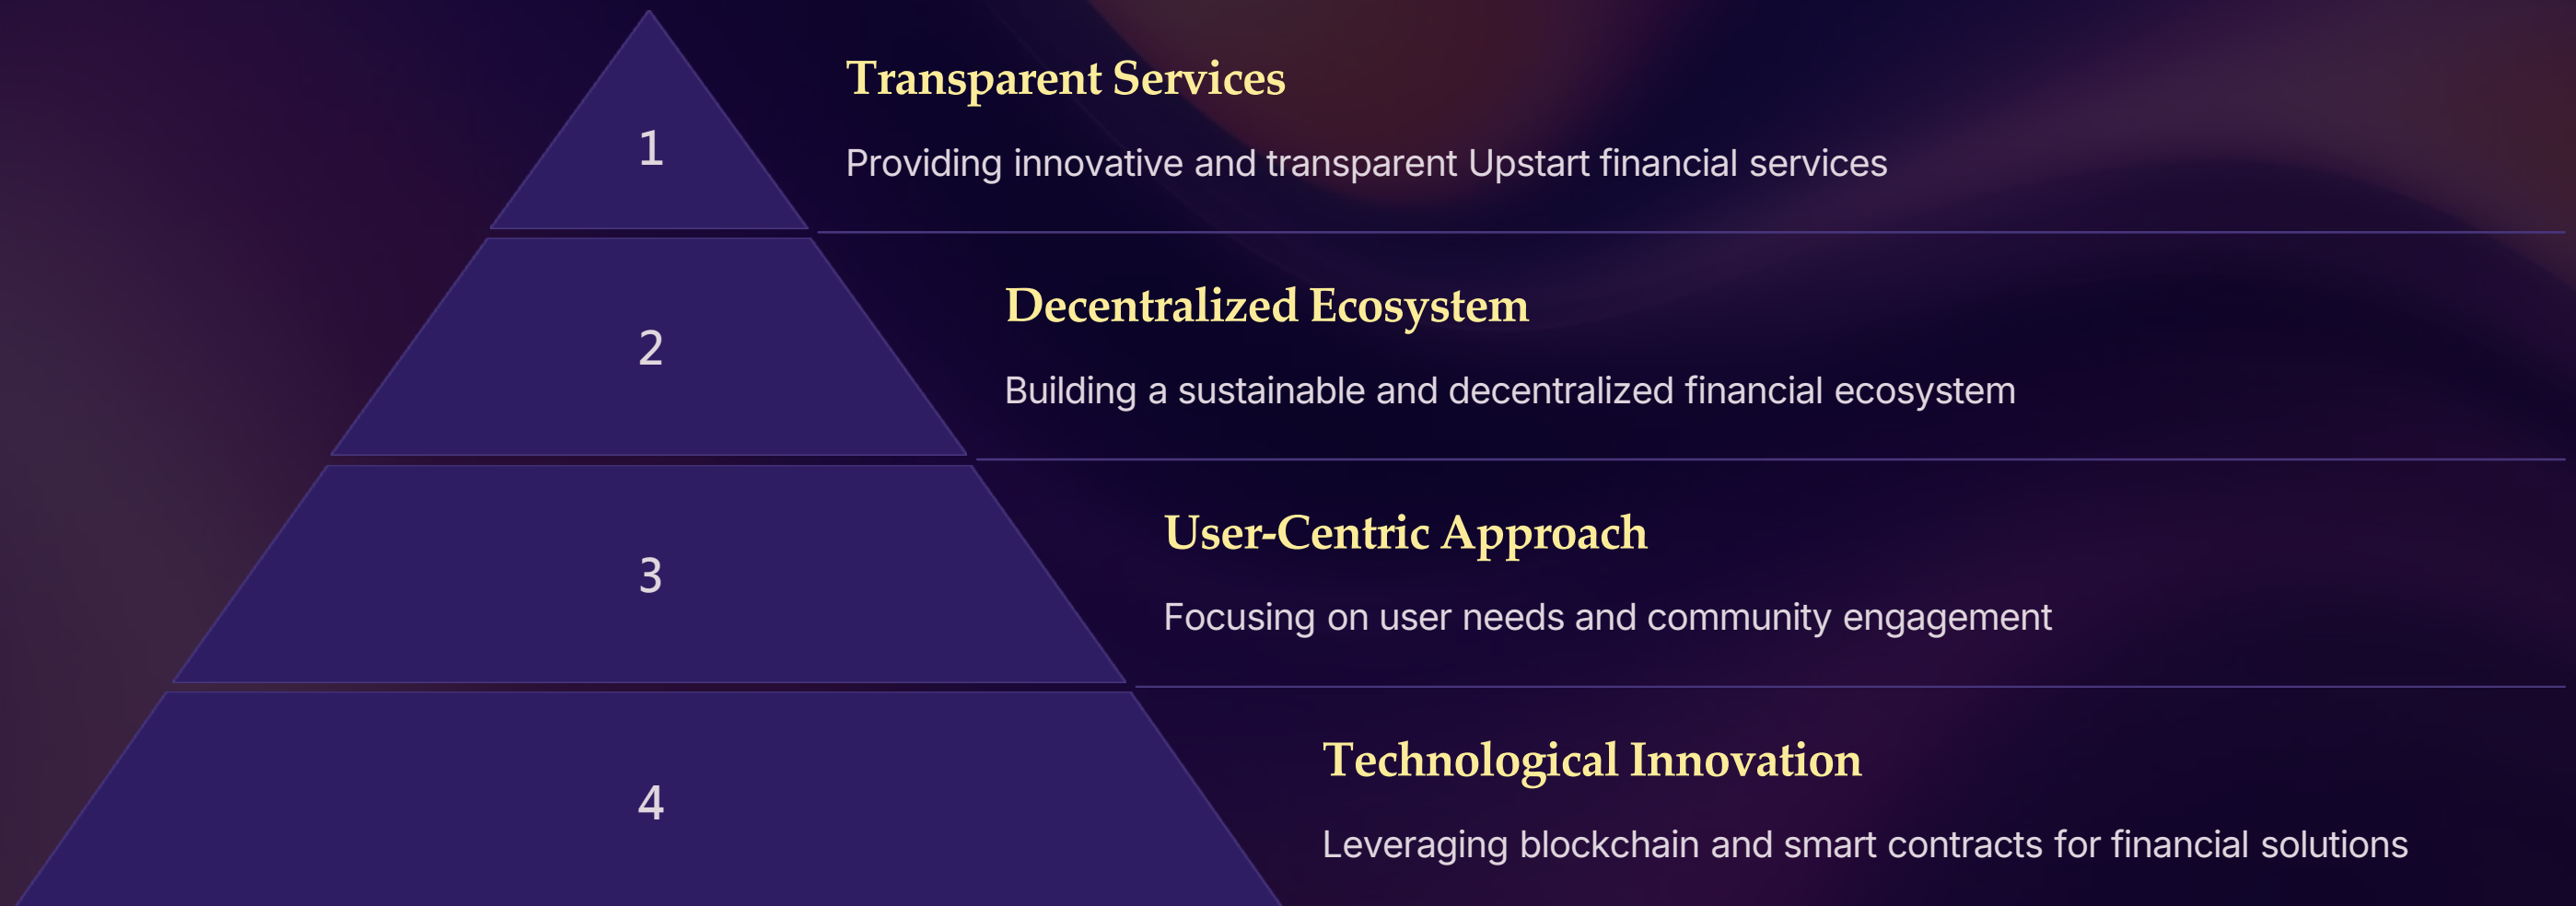

The company values community engagement and will host regular events and forums to attract more users and increase participation.

Ecosystem Building

Quantvine is committed to building a sustainable and decentralized financial ecosystem through the launch and pre-sale of USC tokens.

Innovative Financial Services

Through the launch and pre-sale of USC tokens, Quantvine aims to revolutionize the financial services industry by combining cutting-edge technology with user-centric design. The project's commitment to transparency, decentralization, and innovation positions it at the forefront of the evolving financial landscape.
